CONTEXT

Challenges in Vietnam's Freelance Market

- Freelancers struggle to secure work and manage projects effectively.
- Existing platforms lack features for efficient job matching and seamless project tracking.
- Clients face difficulties finding and identifying qualified freelancers.
- These issues lead to significant inefficiencies, creating a need for a better solution.

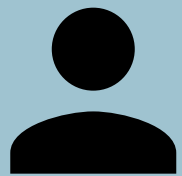

SOLUTION

Proposed Solution: Comprehensive Web & Mobile System

- **A platform that enables users to find/post jobs and track project progress.**
 - **Freelancers can submit proposals, track projects, and communicate with clients effectively.**
 - **Push notifications keep users updated on job postings and proposal statuses, enhancing convenience.**
 - **Content generator tools support user-written sections for improved content quality.**
 - **Equipped with management tools for user management, system settings, and report generation, ensuring better control and oversight.**
-
